Your sending mailboxes: what to do (23 Oct 2026)

You have 130 mailboxes on 26 domains, 5 mailboxes per domain.
"Replies per 100" = how many replies every 100 cold emails get (last 90 days). Average is about 1.
"Spam test" = test emails sent to Gmail, Outlook and others to see if they land in the inbox or in spam.

Do these 2 things

1. Reconnect these 4 mailboxes in SalesBlink (they show a connection error)

- mfarhan@mavixmarketingworks.com
- mdfarhan@mavexmarketing.com
- farhan@mavixmarkeeting.com
- mfarhan@mavixmarketting.com

2. Stop cold email from this domain, keep warm-up on

mavixmarketinghq.com: worst in all 3 spam tests (only 6 of 48 test emails reached the inbox). Its 5 mailboxes:

- farhan@mavixmarketinghq.com
- farhanmohd@mavixmarketinghq.com
- mdfarhan@mavixmarketinghq.com
- mfarhan@mavixmarketinghq.com
- mohdfarhan@mavixmarketinghq.com

Watch these 4 domains (test again next week; rest them if they don't improve)

- mavixmarketinghub.com: 2 replies from 735 emails (0.3 per 100). Spam test: 2 of 6 in inbox.
- mavixmarketingteam.com: 3 replies from 736 emails (0.4 per 100). Spam test: 5 of 18 in inbox.
- mavixmarketinglab.com: 3 replies from 740 emails (0.4 per 100). Spam test: 3 of 6 in inbox.
- mavicmarketing.com: 21 replies from 2,061 emails (1.0 per 100). Spam test: 2 of 6 in inbox.

Keep sending from these 21 domains (best first)

- mavexmarketing.com: 31 replies from 2,260 (1.4 per 100). Spam test 4 of 6. Your best domain.
- mavixmarketinggroup.com: 7 from 595 (1.2)
- mavixgrowth.com: 7 from 614 (1.1). Spam test 6 of 12.
- mavixmarketingservices.com: 8 from 729 (1.1)

- mavixmarketting.com: 15 from 2,038 (0.7)

The big picture

- Gmail sends almost all of our emails to spam, from nearly every domain. Only mavexmarketing.com reached a Gmail inbox in the last test.
- So the main problem is not one or two bad domains. All domains need better inbox placement.
- DNS (MX, SPF, DKIM, DMARC) is set up correctly on all sending domains.
- Instantly warm-up is on for all 130 mailboxes.
- Small numbers: 6 test emails per mailbox is a small test. Re-test weekly before deciding to rest a domain, except mavixmarketinghq.com, which was worst every time.
