MAVIX MARKETING

SEO AUDIT AND 90-DAY PLAN

The best reviews in Marina.
Hidden on Google.

What we found on your website and your Google profile, what it costs you each month, and the 90-day plan to get you found on Google, Google Maps and AI answers.

PREPARED FOR

Lumiere Dental Studio

Cosmetic and general dentistry · Dubai Marina, UAE

SEO | Google Maps | AI search | Content

Prepared by **Mohd Farhan** · Mavix Marketing

Checked on 22 October 2026

01 — THE SHORT VERSION

Patients love you.
Google barely shows you.

If you read one page, read this one. Everything after it is the detail behind these lines.

4.9	310	0	9.4s
Google rating, 214 reviews	Visits a month from Google	Treatment pages on your site	To load on a phone

What we found

- You rank for your clinic's name and almost nothing else. People searching for veneers, implants or Invisalign in Marina find three other clinics first.
- Your site has no page for any single treatment, so Google has nothing to show for those searches.
- 87 spam links point at your site and hold the rest back.

What we would do

- Weeks 1 to 2: fix speed and the spam links, and fill in your Google Business Profile.
- Weeks 3 to 8: one clear page for each treatment you sell, written to answer what patients ask.
- Weeks 9 to 12: reviews, local links and mentions on trusted sites, so Google, Maps and AI answers have reasons to pick you.

The 90-day target: page one on Google for 2 of 10 searches we agree with you before you start. On our main plans, miss it and you get everything you paid back, plus $1,000. Your plan and how to start are on the last page.

What we know about your clinic.

This is what you told us and what we checked on 22 October 2026. Where we had to guess, the box at the bottom says so.

	What we found
Business	Lumiere Dental Studio, a private clinic in Dubai Marina
What you sell	General dentistry, plus veneers, implants and Invisalign
Who books	Marina and JBR residents, often professionals new to Dubai
Where you work	One clinic, Marina Walk. Most patients come from within 5 km
Your goal	In your words: "more implant and veneer patients, fewer cleanings"
What is in the way	No treatment pages, a slow site, spam links
The biggest opening	Your reviews already beat every clinic ranking above you

⚠ **Where we are guessing.** You have not told us your average treatment value, so we used AED 4,200, which is typical for cosmetic work in Marina. Traffic figures come from outside tools until we see your Search Console. Tell us anything we got wrong and we redo it.

You have the reviews. Google is not showing you.

Lumiere has 214 Google reviews at 4.9 stars. That is better than every clinic ranking above you for "dentist dubai marina". Patients who already know your name find you. Everyone else does not know you exist.

Area	What we found	What it costs you
Treatments	Veneers, implants and Invisalign share one Services page	Nothing to show a person searching "veneers dubai marina"
Speed	9.4 seconds to load on a phone	Most people leave before they see anything
Google profile	No service list, no booking link, 11 unanswered questions	Fewer calls from the map
Links	87 of 290 linking sites are paid directory spam	Holds the whole site back

Being the best clinic in the building does not help if the search results say otherwise.

About 2,900 searches a month you never see.

These are Dubai searches, each month, for treatments you provide. You get around 1 percent of the clicks.

2,900
Monthly searches, your treatments

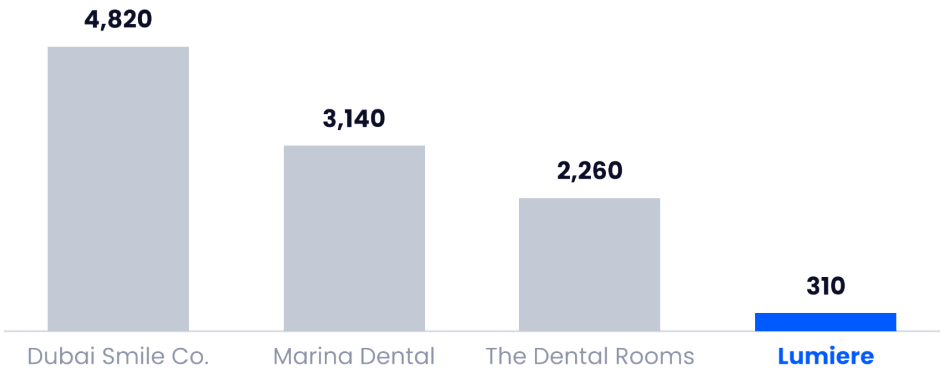

~1%
Your share of clicks

AED 4,200
Average treatment value (estimate)

AED 118K
Estimated monthly gap

Estimated monthly visits from Google, you against three neighbours

Estimate from outside keyword and traffic tools. We replace these with your real Search Console data in week one.

The gap assumes 2 percent of visits book, at the treatment value above. Move either number and the total moves with it.

People now ask Google and ChatGPT. Both need to find you.

Mavix is not a traditional SEO agency. We get businesses found on Google, Google Maps, Google's AI Overviews and AI Mode, and AI assistants like ChatGPT, Perplexity and Gemini. Here is what each of them shows for you today.

2 billion+

People a month reached by AI Overviews. Source: Google (Alphabet), July 2025

8% vs 15%

Searches ending in a click on a normal result, with an AI summary against without. Source: Pew Research, July 2025

Where patients look	What we found for Lumiere on 22 October
Google search	Three clinics show above you for "veneers dubai marina". You show for your own name only
Google Maps	You appear, but the profile has no treatments listed and 11 questions sit unanswered
AI Overviews and AI Mode	The AI summary for "best dentist dubai marina" names two other clinics, not you
ChatGPT, Perplexity, Gemini	Not checked yet. We check all three in week one and show you what they say

Nobody can promise you a place in an AI answer, Google included, and we will not. What we can do is make your clinic the clearest, best-sourced answer for the treatments you sell.

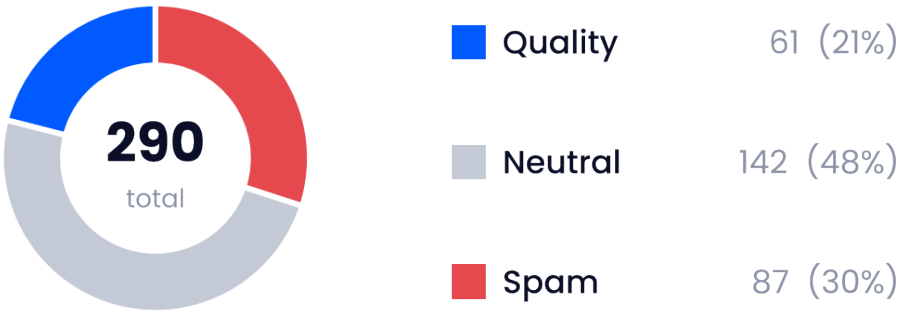

They are not better dentists. They just publish more.

All three clinics ranking above you have fewer reviews than you do. What they have is a page for every treatment and a steady stream of new content.

Clinic	Where they win	Where they are weak	How we take it
Dubai Smile Co.	42 service pages, blog since 2021	Thin content, no Arabic pages	Depth on the six treatments that pay
Marina Dental	Strong local links, 1.8s load	Only 61 reviews, no video	Your 214 reviews, shown as stars in the results
The Dental Rooms	Ranks for implants city-wide	No Marina-specific pages	Own the Marina and JBR searches they ignore

Your backlink profile

290 linking sites. 87 look like paid directory spam.

⚠ **Fix this first.** The spam links hold back every page we would write. We deal with them in week one, before anything new goes live.

07 — THE PLAN

Fix the base first, then build on it.

> Nothing gets published until the site can carry it. A 9.4 second load time wastes every page we would write in month one.

Your first 30 days

1 **Week 1: speed and spam links**
Compress images, remove what slows the page, deal with the 87 spam links. Target under 2.5 seconds on a phone.

2 **Week 2: your Google profile**
Full service list, booking link, the 11 questions answered, weekly posts.

3 **Weeks 3 to 4: the first treatment pages**
Veneers and implants first, written around the questions patients ask.

4 **Week 4: reviews and stars**
A simple review request for past patients, and review markup so stars show in the results.

Google needs time to recrawl each fix and trust each new page. Local searches move faster than city-wide ones, which is why the 90-day target aims at them.

Everything we would work on, and what it means for you.

Seven areas, all done by people on our team and checked by you before anything goes live. How much of each happens every month depends on the plan you pick.

1. **Your website**
   Speed, a clear structure Google can follow, a page for each treatment and each area you serve, and the technical fixes behind the scenes.
   For you: visitors stay instead of leaving, and Google has a page to show for every treatment you sell.

2. **Google rankings and keyword research**
   We find the searches patients actually type, how many people make them, and which ones you can win first.
   For you: the work goes into searches that bring bookings, not just visits.

3. **Blogs and helpful content**
   Articles that answer the questions patients ask before they book, written by a person and approved by you.
   For you: people find you while they are still deciding, and arrive already trusting you.

4. **Links, PR and mentions**
   Links and mentions on trusted sites: local guides, health and news sites, and PR placements.
   For you: other sites vouching for you, which is a big part of what Google and AI tools look at.

5. **Google Maps and reviews**
   Your Google Business Profile kept full and active, and an easy way to ask happy patients for a review.
   For you: more calls and more people asking for directions, straight from the map.

6. **Google's AI Overviews and AI Mode**
   Clear question-and-answer pages and the behind-the-scenes labels Google reads, so it can understand and quote you.
   For you: a better chance of being named in the AI summary at the top of Google. Nobody can promise a place, us included.

7. **ChatGPT, Perplexity and Gemini**
   The same details about you everywhere online, and mentions on the sites these assistants read.
   For you: when someone asks an assistant for a dentist in Marina, you are a clear, well-sourced name to suggest.

Not included. Publisher fees for PR and guest posts, which you pay directly at no markup (we tell you the usual range with your price). A website rebuild. Photography and video. Anything else is quoted before it starts, never after. **What we need from you:** access to your website and Google profile in week one, and a quick read of each page before it goes live.

09 — THE TARGETS

Your 90-day target, and the six-month goals.

The 90-day target is the one the guarantee covers: page one on Google for 2 of 10 searches we agree with you before you start, picked from ones within reach. The six-month numbers below are goals we plan against, not promises.

AGREED SEARCHES ON PAGE ONE	VISITS A MONTH FROM GOOGLE	LOAD TIME ON A PHONE
0 of 10 → 5 of 10	310 → 1,450	9.4s → 2.4s

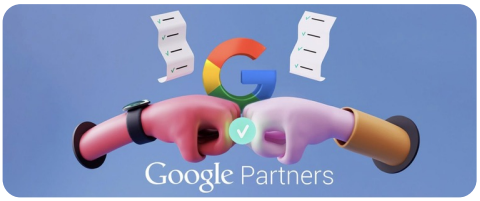

TREATMENT PAGES	SPAM LINKS	GOOGLE REVIEWS
0 → 6	87 → 0	214 → 260

Every number on this page comes out of your Search Console and your Google profile, not ours.

Until we have access to your accounts we work from outside data, so the starting figures are close rather than exact. We confirm them in week one.

Based in Dubai, 30+ people. One named person on your account.

Mavix Marketing is based in Dubai, with a team of 30+ people across Dubai, Los Angeles and New Delhi, all employed by us, not subcontracted. We do SEO, paid ads and email, and have done since 2019. On search we are not a traditional SEO agency: we get businesses found on Google, Google Maps, Google's AI Overviews and AI Mode, and AI assistants like ChatGPT.

Google Partner

Google Partner. We work inside Google's tools every day, and every account we set up is created in your name.

You get one named account manager for the day to day, so you never write to a shared inbox. Our founder, Mohd Farhan, takes the first call and joins every monthly review. Reports lead with enquiries, and every number comes from your own accounts.

A FEW OF THE BRANDS WE HAVE WORKED WITH

The part you should check for yourself.

Every name below is a real client. Ask for an introduction to any of them before you sign anything.

Jonathan Jones
Sales Director, Carpenter and Paterson Asia Ltd

★★★★★

"Farhan learned what we actually sell before writing a word. Website enquiries went from a trickle to something sales has to keep up with."

Lisa Wrake
Founder, Run Wrake

★★★★★

"Two agencies before this sent lovely reports and no customers. Less reporting theatre here, more actual traffic. I can see which pages bring people in."

Judy Li
Founder and CEO, Brother Filtration Equipment Co

★★★★★

"Filtration is a slow, technical sale. We now rank for the exact problems our buyers search at 2am, and the enquiries already know what they need."

Mohammed Ahmed
Business owner

★★★★★

"Three agencies before this and none of them ever showed me a number I could check. This one does, every month."

We would rather you call one of them than take our word for it. Say the word and we will make the introduction.

CASE STUDY

9.94K clicks from Google in seven months

Construction management firm · mavixmarketing.com/case-studies/construction-management-seo

THE CHALLENGE

A construction management firm selling a high-value service that buyers research before they pick up the phone. Google was not sending enough of those buyers to the site.

STRATEGY

Make every service easy for Google to understand and match to a search, then build the authority those pages need to rank.

EXECUTION

1. Rebuilt the service pages around what buyers actually search.
2. Tidied the site structure and on-page basics so Google could read it.
3. Earned links and mentions on relevant sites.

GOALS AGREED AT THE START

More clicks from Google on the searches that lead to enquiries, measured in the firm's own Search Console rather than a ranking report.

TIMELINE

Seven months to the figures shown. Daily clicks from Google roughly doubled.

WHAT GOT IN THE WAY

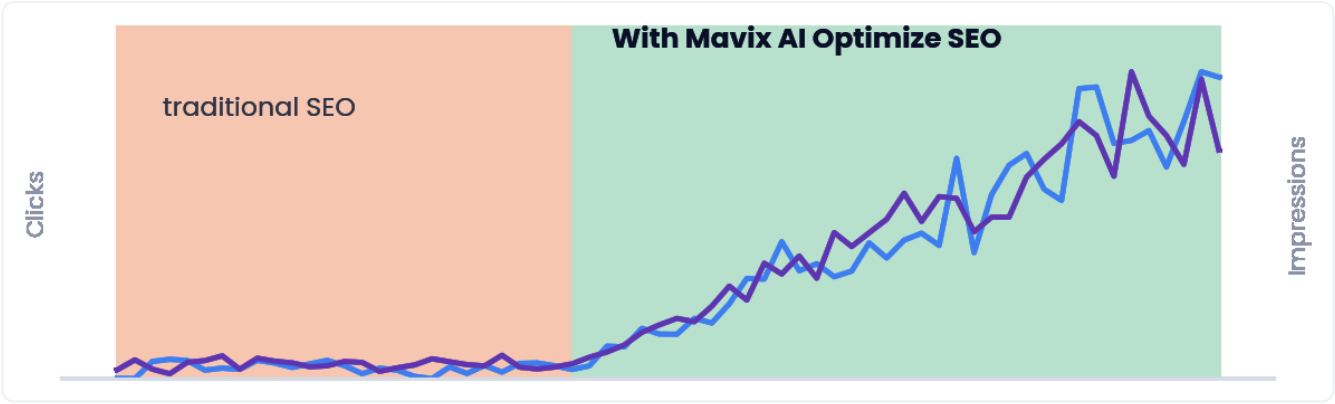

Search work compounds slowly, so results build over months, not weeks. The answer is holding the plan rather than chasing shortcuts.

WHY IT WORKED

Steady work on the pages that matter, measured in the client's own Search Console. Nothing clever, done properly.

Search Console, seven months, totals for the period — GOOGLE SEARCH CONSOLE

9.94K	406K	2.4%	14.0
TOTAL CLICKS	TOTAL IMPRESSIONS	AVG CTR	AVG POSITION

Client's own Google Search Console. Red zone is before, green zone is after we took over.

Different field, same kind of buyer.

A clinic and a construction firm both sell a service people research before calling. Full case study: mavixmarketing.com/case-studies/construction-management-seo

Read the full case study

CASE STUDY

326K clicks from Google in 16 months

HR software company · mavixmarketing.com/case-studies/hr-software-seo

THE CHALLENGE

An HR software company whose buyers compare several tools before they choose one. The site needed to show up while that comparing was happening.

STRATEGY

Give every search a buyer makes one page that answers it properly, then keep adding to the set.

EXECUTION

1. Mapped the searches buyers make to pages on the site.
2. Wrote and improved the content for those searches.
3. Built links from relevant sites to grow authority.

GOALS AGREED AT THE START

Grow clicks from Google on the searches buyers make while they compare, and keep growing them month after month.

TIMELINE

Sixteen months to the figures shown.

WHAT GOT IN THE WAY

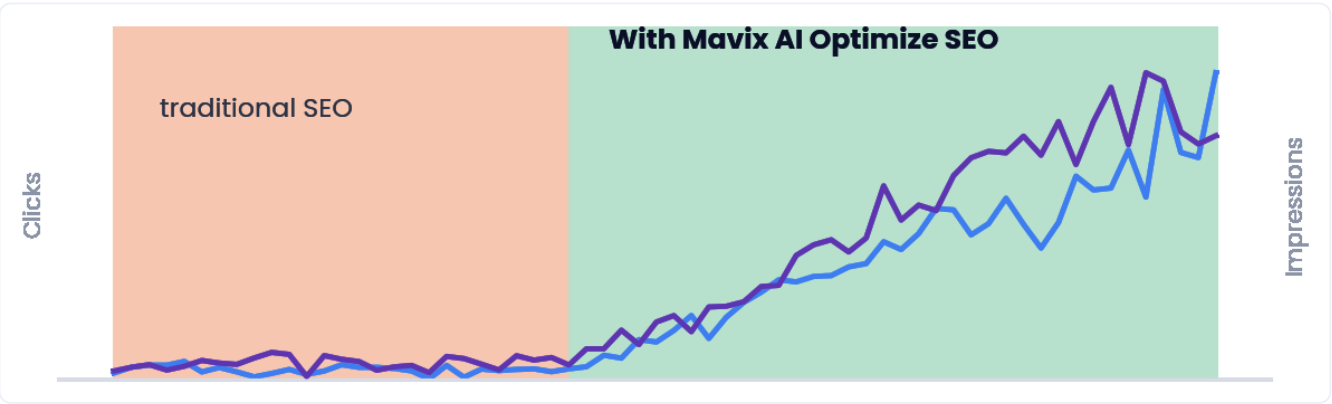

Software is a crowded search space, so generic content does not rank. Every page had to say something specific.

WHY IT WORKED

Search keeps compounding when the work is steady and the pages answer real questions.

Search Console, 16 months, totals for the period — GOOGLE SEARCH CONSOLE

326K	9.77M	3.3%	19.2
TOTAL CLICKS	TOTAL IMPRESSIONS	AVG CTR	AVG POSITION

Client's own Google Search Console. Red zone is before, green zone is after we took over.

This is what it looks like at scale.

Your treatments are not software, but the mechanics are the same. Full case study: mavixmarketing.com/case-studies/hr-software-seo

CASE STUDY

470K clicks from Google in 12 months

Online home goods store · mavixmarketing.com/case-studies/home-goods-retailer-seo

THE CHALLENGE

An online home goods store, where every category and product page is a chance to be found, but only if Google can find and understand it.

STRATEGY

Treat the product range as the content, so each category and product page can rank on its own.

EXECUTION

1. Tidied the category structure so Google could reach the range.
2. Improved category and product page content.
3. Fixed the technical basics: titles, internal links and page structure.

GOALS AGREED AT THE START

More clicks from Google across the whole range, not just a handful of top pages.

TIMELINE

Twelve months to the figures shown.

WHAT GOT IN THE WAY

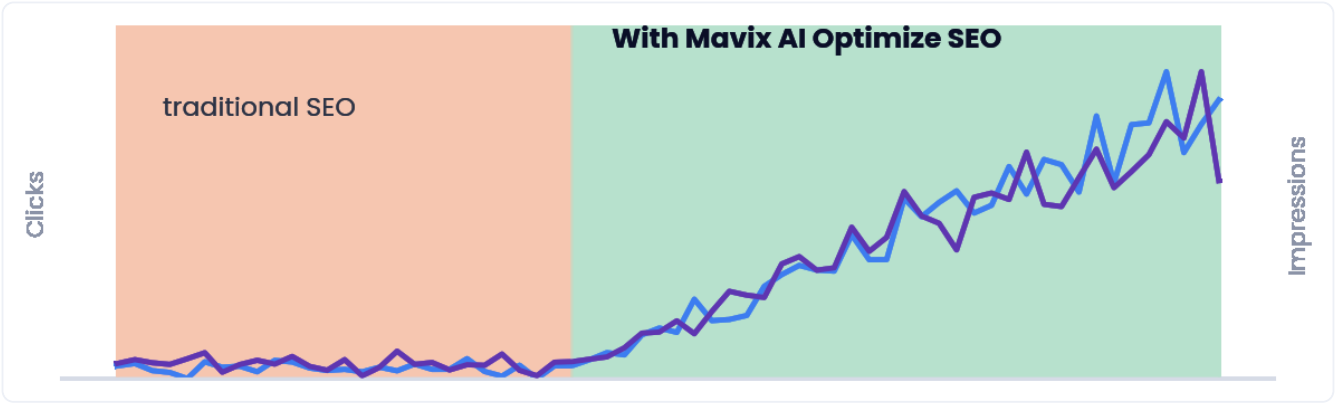

A store has a long list of pages to fix, so the work is ordered by what is most likely to sell.

WHY IT WORKED

For a store, getting the range seen is most of the job. Every figure here comes from the client's own Search Console.

Search Console, 12 months, totals for the period — GOOGLE SEARCH CONSOLE

470K	21.3M	2.2%	8.8
TOTAL CLICKS	TOTAL IMPRESSIONS	AVG CTR	AVG POSITION

Client's own Google Search Console. Red zone is before, green zone is after we took over.

Small clinic, same principle.

Six treatment pages is a smaller job than a full online store, and it moves faster. Full case study: mavixmarketing.com/case-studies/home-goods-retailer-seo

✦ 15 — QUESTIONS

The ones dentists actually ask.

1 **How long before I see a booking that came from this?**
First page-one rankings usually land around month three. Bookings that trace back to Google normally show around month four. Anyone promising week-two results is selling you ads.

2 **Would Google Ads be faster?**
Yes, for bookings next month. Ads stop the day you stop paying, though. Many clinics run both while rankings build, and we will tell you honestly if ads suit you better.

3 **Will I show up in ChatGPT or Google's AI answers?**
Nobody can promise that, Google included. We make your treatments the clearest, best-sourced answer on the web, which is what those tools draw on.

4 **Who writes the content? Is it AI?**
A person, and you sign off every page before it goes live. For dental content they work from your own treatment notes.

5 **What does it cost?**
It depends on the plan and on how much your site needs. Reply "yes" and we send your plan and your personalised price, or ask us on the 15-minute walkthrough. No setup fee either way.

6 **Is there a contract?**
No long contract. The agreement has no time limit and only ties us, to deliver. No setup fee.

7 **What exactly is the guarantee?**
On our main plans, Growth and Premium: we agree the 90-day target in writing before you start. Miss it and you get everything you paid back, plus $1,000. Starter has no guarantee.

8 **How much of my time does this take?**
About an hour in week one, then a 30 minute call a month and a quick read of each new page.

How the day to day actually works.

For	We use
Day to day	Email or WhatsApp, whichever you prefer
Calls	Google Meet, booked when it suits you
Reporting	One written report a month you can read in five minutes, plus a 30 minute call
Anytime	A live dashboard on your own Search Console and Analytics

You deal with one named account manager, not a shared inbox, and Mohd Farhan joins every monthly review. We answer on the same working day, and anything bigger than a quick change gets a date rather than a maybe.

YOURS, ALWAYS

Your domain, your website and everything on it.

Search Console, Analytics and your Google Business Profile.

Every page and article we write for you.

WHAT MAVIX GETS

The access needed to do the work, and nothing more.

If an account has to be created, it is created in your name.

You can remove our access at any time without asking.

⚠ **If you decide to stop.** No long contract, no penalty, no cancellation fee. Your accounts, pages and reporting history stay where they are, and you get a final report and everything we built.

Your plan, and how to start.

RECOMMENDED FOR LUMIERE DENTAL STUDIO

The Growth plan

Treatment pages, your Google profile and trusted links, built up month by month for Lumiere.

90-day money-back guarantee: miss the target and you get everything you paid back, plus $1,000.

EVERY MONTH

- 3 to 4 treatment pages or articles
- 2 guest posts and 1 PR placement
- Google Business Profile and review requests
- A written report and a 30 minute call

THE 90-DAY TARGET WE WOULD AGREE

Page one on Google for 2 of 10 searches we agree with you before you start.

Picked together from searches within reach, such as "veneers dubai marina". Checked in your own Search Console on day 90.

THE FIRST THREE THINGS WE DO

1. **Speed and spam links**
   Your site under 2.5 seconds on a phone, the 87 spam links dealt with.
2. **Your Google profile**
   Treatments, booking link and the 11 open questions answered.
3. **Veneers and implants pages**
   The first two treatment pages, ready for you to read and approve.

Two ways to move forward
