Mailbox health, 21 Oct 2026 (last 90 days, SalesBlink)

DNS: 28 of 29 domains pass SPF, DKIM, DMARC and MX (Instantly check). grantcalculator.ca fails SPF and DMARC; it is not a cold email sender.
Instantly warm-up: on for all 130 sending mailboxes, health 100.

Mailbox health table (read-only snapshot, 2026-10-21 ~18:50 UTC)

Windows: 90d = 2026-07-23 to 2026-10-21, 30d = 2026-09-21 to 2026-10-21 (get_analytics_mailbox_stats with from/to). Rates are computed here from counts.
DNS columns: NOT CHECKED. DNS over HTTPS (dns.google, cloudflare-dns.com and others) was blocked by the session's egress proxy, and SalesBlink's get_sender_health reports no SPF/DKIM/DMARC/MX data. So MX/SPF/DKIM/DMARC are shown as 'n/c' (not checked), not yes/no.
Verdict = first matching of: likely spam (>=300 sent in 90d with 0 replies, OR 90d reply rate <0.2%; applied literally, so mailboxes with 0 replies on fewer than 300 sends also land here and are marked '(<300 sent)' in All flags as weaker evidence), error (health 'error' field set), high bounce (>2%, 90d), high unsub (>2%, 90d), ok. 'All flags' lists every rule that matched.
